

Temporary authorization request, Met Lab

The U.S. Department of Energy-Savannah River Operations Office has requested from the South Carolina Department of Health and Environmental Control a temporary authorization for the operation of up to 20 barometric pumping wells to be located in the vadose zone near the Metallurgical Laboratory Hazardous Waste Management Facility (Met Lab).

The temporary authorization, requested for the maxi-

mum allowable 180 days, will permit remediation activities to begin while the Met Lab Corrective Action Plan is reviewed.

The corrective action plan was submitted in February 1997 as a revision to the site's 1992 Part B renewal application.

More information is available by contacting the personnel listed below.
